

To complete the picture, even the exclusive designs made by in-house designers, artists and stylists of Mozaic, which can be customized right from scratch, seem to fit in perfectly. It is this balance in almost everything that most certainly sets apart the store, from its counterparts. Among the services offered, as an add on, the store also offers full styling services that takes care of the accessorising for an entire site or a single area.

Shilpa sums it up aptly, "Mosaic is an assemblage of various elements that come together to form a coherent whole and it perfectly suits the personality of the Mozaic store." ❀
